EDUCATION

DAVAO ORIENTAL STATE UNIVERSITY

City of Mati, Davao Oriental

BS Information Technology

2026

General Weighted Average (GWA): 1.5428 / 1 (Cum Laude)

Relevant Coursework: Object-Oriented Programming, Data Structures & Algorithms, System Administration, Mobile Systems, Web Systems, Database Systems, Cloud Computing

EXPERIENCE

DICT – DOrSU (386 hours – Internship)

City of Mati, Davao Oriental

Web Developer

February 2026 – June 2026

- Built job posting and application modules for a Human Resource Information System (HRIS), supporting the university's active recruitment workflows.
- Developed the employee data management module, centralizing records for 400+ employees previously tracked manually.
- Collaborated with a cross-functional dev team to integrate core HRIS modules into a single system.

FREELANCE DEVELOPER (Remote)

December 2024 – February 2026

- Delivered UI/UX design, web, and cross-platform mobile app solutions (React, React Native, Expo, TypeScript) for 5+ freelance clients, translating client requirements into production-ready MVPs.
- Developed and deployed a production-ready cross-platform mobile application as the sole developer, delivering the frontend, backend, cloud infrastructure, and App Store/Google Play submission.
- Implemented authentication, state management, REST API integration, and AWS deployment.

PROJECTS

KAPPI: COFFEE LEAF DISEASE DETECTION | *React Native, Python, AWS, TensorFlow, OpenCV*

- Built a cross-platform mobile application for on-device coffee leaf disease classification and severity estimation using TensorFlow Lite, supporting four disease classes.
- Developed secure backend services with JWT authentication, RESTful APIs, offline synchronization, and AWS ECS while implementing a MobileNetV2 model that achieved 89% validation accuracy.

ACCESSMAP PH | *React, Vite, Node.js, Express, MongoDB, Firebase*

- Built a crowdsourced accessibility mapping platform enabling Filipino PWDs to report and discover real-time accessibility conditions using an interactive map.
- Implemented community moderation, trust-based voting, and location-based reporting to improve the accuracy and reliability of accessibility data.

EVA ALERT: EMERGENCY SOS APP | *React Native, Node.js, Express, AWS, MongoDB*

- Developed an emergency SOS mobile application with SOS alerts, emergency contact notifications, and location sharing.
- Integrated BLE pairing with a pull-activated wearable device, instantly sending SOS alerts and real-time location to emergency contacts.

SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, Java, Python, PHP, SQL

Frameworks: React, React Native, Expo, Node.js, Express

Tools & Technologies: AWS, Docker, Git, Firebase, Figma
